

Quality and Environmental Policy

Objectives:

Resource

- Ensure the resource necessary to meet quality and environmental objectives are made available and reviewed for adequacy.
- Ensure personnel understand their local requirements within our management systems and the requirements of interested parties.
- Ensure personnel are aware of their responsibility for quality and the environment.

Environmental aims and impact awareness

- Ensure awareness of the environmental impact of what we do in all areas of our operation.
- Actively minimise waste.
- Reduce the amount of energy consumed.
- Commitment to prevention of pollution and to protect the environment.

Continuous improvement

- Continually improve the organisation's management systems to enhance performance in the areas on quality, cost, delivery, technology and the environment.
- Ensure the management systems of the organisation are reviewed for effectiveness and suitability and conform to the requirements of IATF 16949 and ISO 14001 and any other appropriate International Standards. This is achieved through support and involvement of all employees and interested parties.

Compliance

- Fulfil compliance obligations, including legal and other interested party requirements.

Interested parties

- Meet the requirements and expectations of interested parties.
- Consider product requirements during the advanced quality planning stage of any new or modified product to identify risks to the organisation, the environment and interested parties.
- Promote product safety, site safety and environmental awareness within the organisation.
- Where possible, introduce green procurement by adhering to life-cycle thinking in availing products and services from suppliers and contractors.
- Encourage and support our suppliers to adopt our quality and environmental principles and develop respective management systems within their own organisation.
