Energy Policy

Kasai UK Ltd design, manufacture, assemble and deliver interior products for the automotive industry.

We are committed to achieving industry leading energy performance by actively and responsibly managing our usage of energy, so as to reduce our carbon footprint. Meet our customers' expectations and build a sustainable future for the company.

To achieve this, we have implemented an Energy Management System in accordance with ISO 50001, Kasai hereby commit to:

- Establish a framework for setting and reviewing our energy objectives and targets. Ensure the necessary resources are allocated and that information is available to achieve success.
- Continually improve our energy performance and Energy Management System.
- Regularly monitor our energy consumption.
- Frequently review applicable legislation to ensure conformity to local, national and international regulations for energy efficiency, use and consumption.
- Include energy performance improvements in the design activities for any projects that will have a significant impact on energy consumption and support the purchase of energy efficient products and services.
- Encourage employee involvement at all levels of the business and to promote it through training and communication.
